## 1. INTRODUCTION

This report describes the activities carried out during a period of 30 Days of internship program at **SNEW COMPUTERS** . The document contains information about the organization and the responsibilities performed throughout the period between 18<sup>th</sup> December 2024 to 18<sup>th</sup> January 2024 . More than a plain account of tasks, the objective of this text is to reflect upon the experiences collected during the internship from the perspective of a B. Sc Computer Science Student. The first part of the report offers an overview of the organization, followed by an outline of all duties carried out during this time. Following, it proceeds to describe in some details about the activities and their respective analysis.

The Internship was not on Sundays and there was no Internship on Government Holidays also. The Company had a better infrastructure where it is comfortable to learn new things all about data entry management. The main reason to do my internship here is because of my interest in Data of some companies and their roles and the places the company was located. My internship has allowed me to learn more about hardware , software , how to market the product and collecting the data of companies and informations.

Formal Dress code has been followed at the Internship for every Interns present over there because Dress code is a key factor that defines one's personality.

## **2. COMPANY PROFILE**

We are excited to introduce Snew Computers Private Limited, a New and dynamic company, we are a start-up with a fresh and innovative approach to IT Solutions and services. Our mission is to be the trusted advisor for our clients by delivering exceptional hardware and IT solutions that enhance their operations and competitiveness, and we are driven by a passion for technology and innovations. ### 3. SUMMARY OF THE INTERNSHIP

~ My internship was very interesting and based on hardware and software marketing. In the first week of internship, we met the infrastructure of the office and employees. They treated us in a very good manner and they told us about their company role. In the first week of internship they taught us about the training of hardware, software and how to market the product.

~ I was trained by well-experienced staff members. After my training was over, I was given the opportunity to learn the objectives as well as how to manage and analyze data and the various processes involved.

~ The 2<sup>nd</sup> week of internship, we met the manager of the company and it was the best experience we got. We introduced ourselves and the manager took the interview. We answered some questions and he appreciated. He assigned a field work for us to collect information and tell about the hardware and software components to the customers.

~ After the end of the field work, HR gave the next work as collecting the data of IT Companies and entering it in Excel based on data entry management of how data is handled and analyzed, with a primary focus on using **Excel** as a tool to perform basic data entry tasks.

## **5. ASSESSMENT OF THE INTERNSHIP**

1. What kind of responsibilities you have undertaken during the internship period?

During my internship at Snew computers Private Limited, I undertook responsibilities, like teaching the hardware and software components training. I worked with tools like how to sell the product in marketing, gaining hands-on experience . I also utilized Microsoft Teams for professional collaboration and gained exposure further enhancing my technical skills. These tasks allowed me to apply theoretical knowledge to real-world projects, work in a professional software development environment, and gain valuable insights into the operations of an IT organization.

2. What skills and qualifications you think that you have gained from the internship?

During my internship, I gained valuable skills in data entry management, collecting information, and save in excel sheets. I also improved my time management, teamwork, and collaboration abilities by working in a professional environment and using tools like Excel and some of the applications. This experience has prepared me for real-world software development and provided a clear understanding of how IT teams operate behind the scenes. I had the opportunity to connect with and learn from experienced professionals, which gave me fresh ideas and insights into industry practices.

3. How do you think the internship will influence your future career plans?

The internship has shaped my career plans by enhancing my skills in software development, tools used for software development, and professional teamwork. It clarified my interest in software development and gave me confidence to handle data entry and data collecting management while motivating me to continue learning and growing in the tech industry. I also get to know that i need to be improved a lot for this modern world technologies.

4. How do you think the internship activities that you carried out are correlated with your classroom knowledge?

I was able to apply the software development and problem-solving skills I learned in college during my internship. My understanding of programming concepts and project management helped me adapt quickly to tasks and contribute effectively to the work. This experience Allowed me to gain confidence.

## 6. CONCLUSION

Completing my internship in the **Snew Computers Private Limited** has been an incredibly rewarding experience that has enriched my technical knowledge and professional growth. Through this opportunity, I have gained hands-on exposure to real-world projects, enhancing my skills in [hardware & software and data entry management during the internship]. Working alongside experienced professionals has given me valuable insights into problem-solving, collaboration, and time management in a fast-paced industry.

This internship has not only strengthened my understanding of the IT field but also boosted my confidence to challenging tasks and adapt to new technologies. The practical knowledge and mentorship I received have prepared me to contribute effectively to future projects and excel in my career path. Overall, this experience has been a pivotal step in aligning my academic learning with industry requirements, fostering both personal and professional development.
